Ex.5 : Image transfer

ImageClient.java

```
import java.io.*;
import java.net.*;

public class ImageClient {
   public static void main(String[] args) {
      try {
         // Recommended: copy image outside OneDrive, e.g., D:/test.jpeg
         String imagePath = "D:/test.jpeg"; // Use forward slashes

         File imageFile = new File(imagePath);
         System.out.println("Working directory: " + System.getProperty("user.dir"));
         System.out.println("Absolute path: " + imageFile.getAbsolutePath());
         System.out.println("File exists? " + imageFile.exists());

         if (!imageFile.exists()) {
            System.out.println("ERROR: File not found! Check the path.");
            return;
         }

         // Connect to server
         Socket socket = new Socket("localhost", 5000);
         System.out.println("Connected to server");

         // Send image
         FileInputStream fis = new FileInputStream(imageFile);
         OutputStream out = socket.getOutputStream();

         byte[] buffer = new byte[4096];
         int bytesRead;

         while ((bytesRead = fis.read(buffer)) != -1) {
            out.write(buffer, 0, bytesRead);
         }

         out.flush();
         fis.close();
         out.close();
         socket.close();

         System.out.println("Image sent successfully");

      } catch (Exception e) {
         e.printStackTrace();
      }
   }
}
```

ImageServer.java

```
import java.io.*;
import java.net.*;

public class ImageServer {
   public static void main(String[] args) {
      try {
         ServerSocket serverSocket = new ServerSocket(5000);
         System.out.println("Server started... Waiting for client");

         Socket socket = serverSocket.accept();
         System.out.println("Client connected");

         InputStream in = socket.getInputStream();
         FileOutputStream fos = new FileOutputStream("received_test.jpg"); // saved in server folder

         byte[] buffer = new byte[4096];
         int bytesRead;

         while ((bytesRead = in.read(buffer)) != -1) {
            fos.write(buffer, 0, bytesRead);
         }

         fos.close();
         in.close();
         socket.close();
         serverSocket.close();

         System.out.println("Image received successfully");

      } catch (Exception e) {
         e.printStackTrace();
      }
   }
}
```

Server output:

```
D:\>javac ImageServer.java

D:\>java ImageServer.java
Server started... Waiting for client
Client connected
Image received successfully
```

Client output:

```
D:\>javac ImageClient.java

D:\>java ImageClient
Working directory: D:\
Absolute path: D:\test.jpeg
File exists? true
Connected to server
Image sent successfully
```
